

In Partnership With

the
play
company

About Us

Hi, my name is Scott Benjamin and I started TwoCubed to bring my 30+ years of leadership experience including spending the past 10 years working with some amazing people in the FEC (Family Entertainment Center) industry with an emphasis on Trampoline and Adventure Parks.

TwoCubed is proud to represent The Play Company, a global leader in “The World of Play” with exciting play structure designs, Strike Arenas and continuous innovation.

If you want to start or grow your business with us, the conversation starts with you reaching out, **1-678-270-6275** or **scott@twocubedllc.com**

In Collaboration with The Play Company

At The Play Company, we exist to help our clients in the world of play to thrive. We do this by designing and manufacturing play equipment in our Devon factory and installing it all over the world.

Whether you are after indoor or outdoor play, inflatable parks or Strike Arena, we've got you covered.

We also offer a variety of maintenance and cleaning services, so you can get on with doing what you do best – running your attraction, generating revenue and growing your business.

Our Services

- ✓ Play Area Design and Installation
 - Soft Play Areas
 - Strike Arenas
 - FEC Designs
 - Trampoline Parks
 - Inflatable Parks
 - Ninja Courses
 - Climbing Walls and Climbing Gyms
 - High Ropes Courses
 - Outdoor Play Structures
- ✓ Maintenance and service
- ✓ Sanitised Ball Washing
- ✓ Trampoline Park Maintenance
- ✓ Online Shop

Timeline

1 DESIGN

We will work with you and the space you have to work out the best features for you. Then we will create the perfect design for that space.

2 ANALYSIS

We will help you to understand your target market, complete a competitor analysis and perfect your business plan to achieve success

3 MANUFACTURING

After the design is signed off, we get creating – our team right here in the UK will cut and sew, hammer and glue until all the hardware is ready to go.

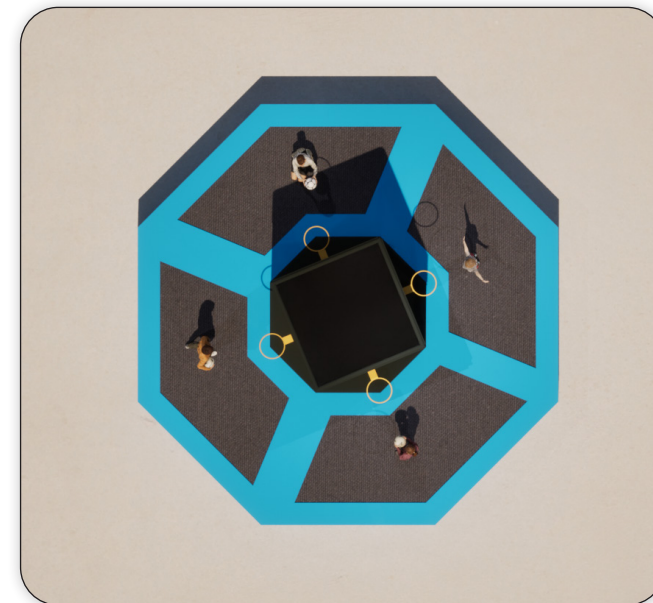

4 INSTALLATION

We will get cracking on site, with our expert team swiftly and safely building your play installations.

3

Wipeout Retrofit

Option 1

Basketball Hoops

- 4 Player basketball game
- Can be upgraded with interactive hoops

Wipeout Retrofit

Option 2

Strike Arena

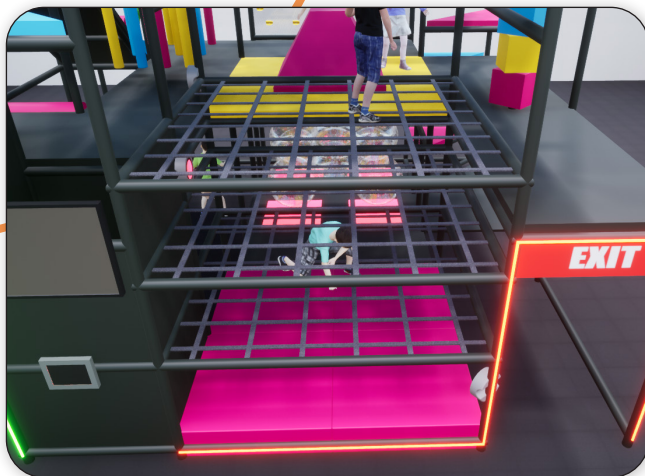

20ft x 20ft x 19.7ft

Quick to start: This game is for unsupervised environments, with very simple game starting instructions.

- Players can start independently of each other, choosing one of up to 6 colours available at the time they begin
- Each player/colour plays independently of the other players/colours, with the time remaining being shown on the live scoreboards.
- When one colour's game time is complete, after a short pause a new player can start to chase that colour
- Lit pods are distributed equally across the six colours, with 1/6th of all available pods being allocated to each player/colour at any one time.

Wipeout Retrofit

Key Features

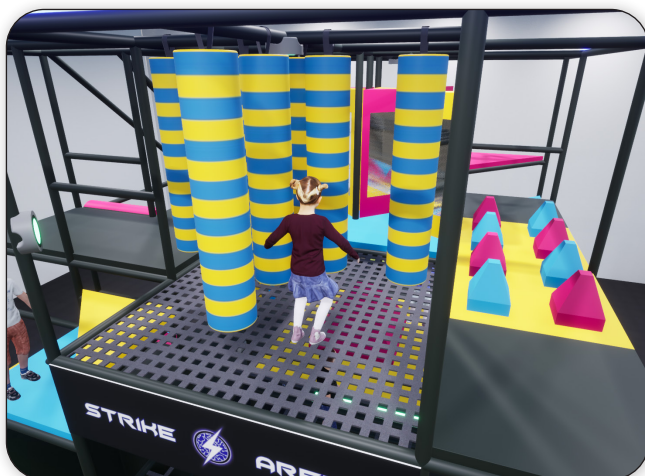

Power Tower

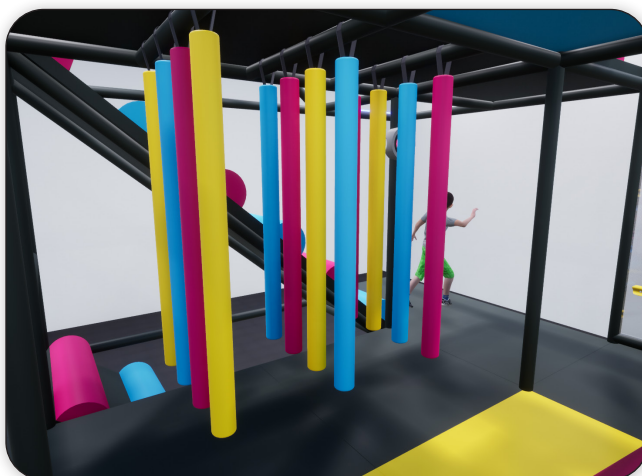

Mirror Maze

Climbing Walls

Web Deck & Bag Blitz

Hanging Snake Forrest

Giant Stalagmite

Wipeout Retrofit

Key Features

Giant Balls

Cube Roller

Clear Deck Board

Stalagmites

Wipeout Retrofit

Option 3

Powr Play - Penalty Shootout

12t x 16ft x 8.9ft

Interactive target system for multi-
sport pitches

Wipeout Retrofit

Option 4

Spiral Slide Tower

A self standing Spiral Slide Structure complete with climb up tower.

Dodgeball Court Retrofit Option 1

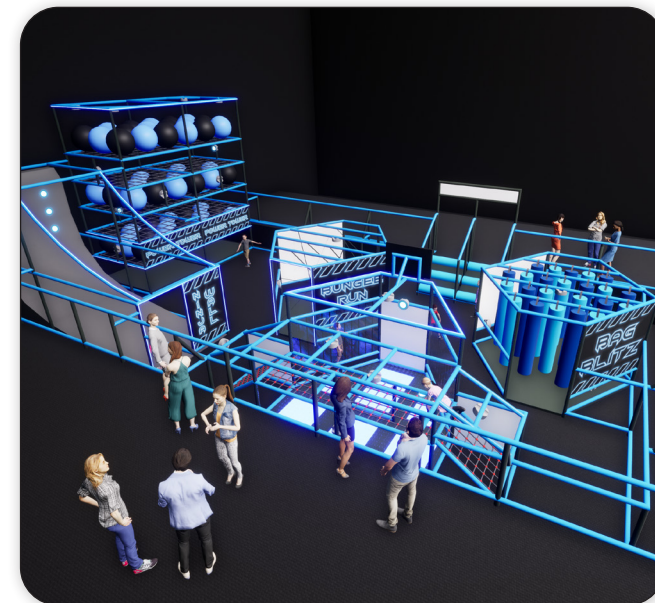

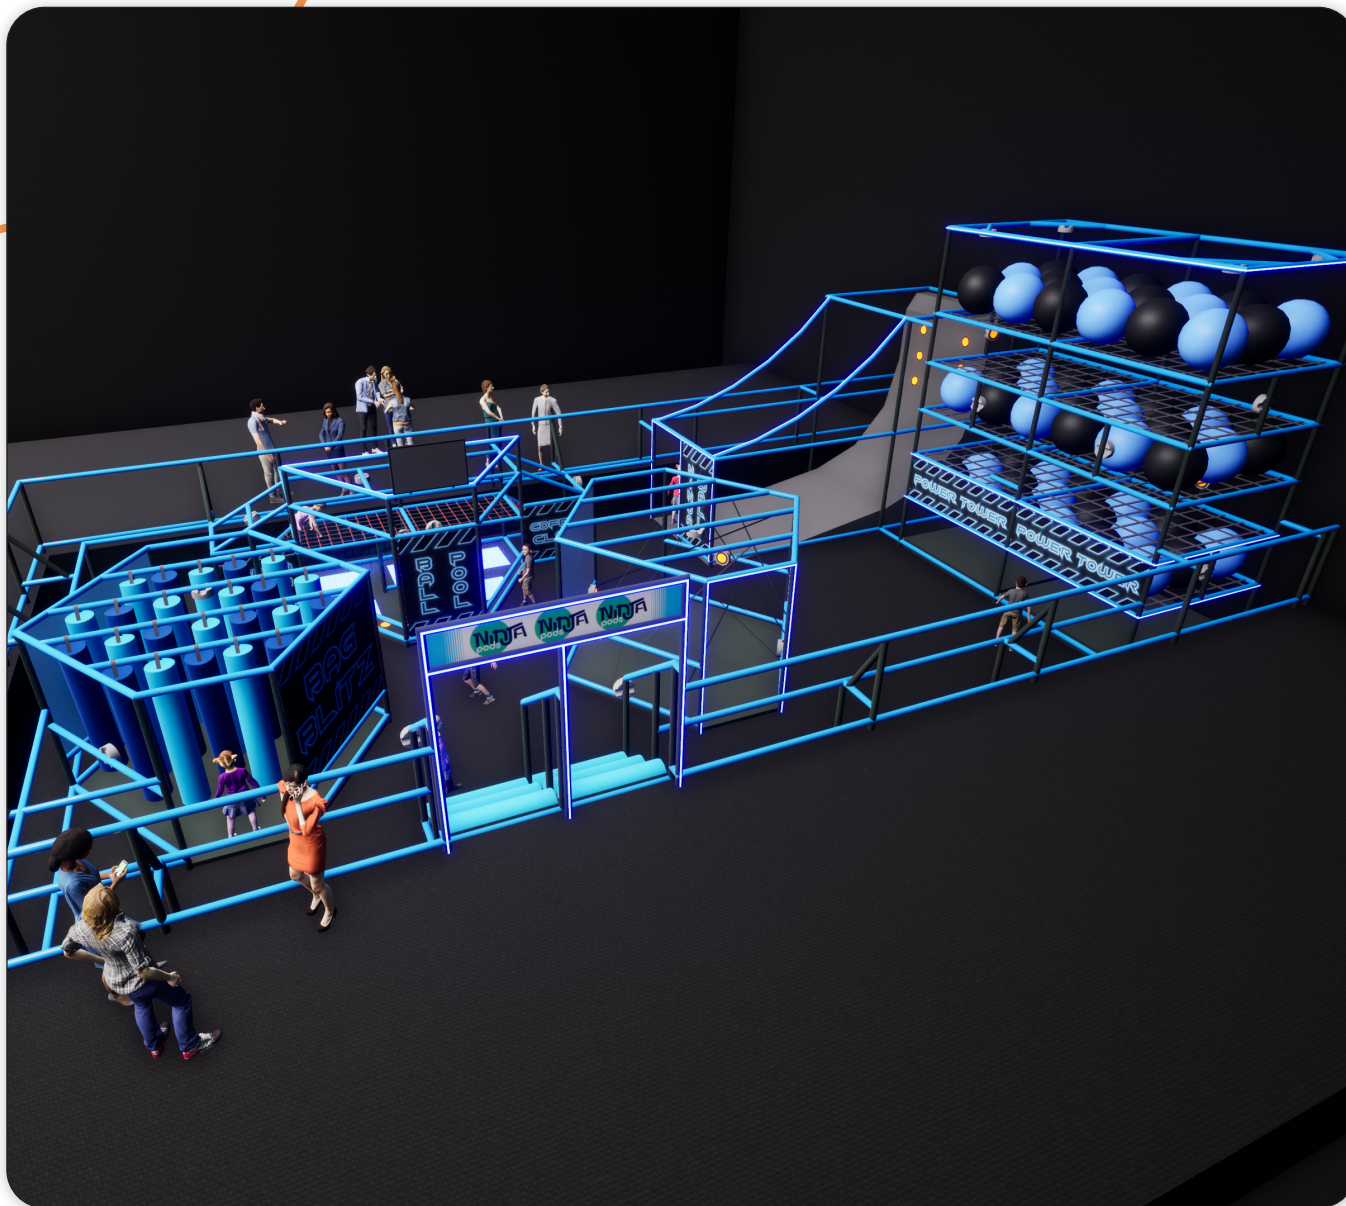

Strike Arena 41.5ft x 42ft x 18ft

Players are divided up into up to 3 teams, and a game time of 5, 10 or 15 minutes is selected by the game marshal.

- All the pods in the arena are lit up, divided equally between the chosen teams' colours, e.g:
 - Scenario 1: 30 pods in the arena, 3 teams = 10 random pods are lit in three alternate colours.
 - Scenario 2: 30 pods in the arena, 4 teams = 7 random pods are lit in each team's colour and 2 remain unlit.
- Players score points for their team by hitting the pods in their team's colour.
- The aim is to score more points than your opponents in the allotted time.

Dodgeball Court Retrofit Option 2

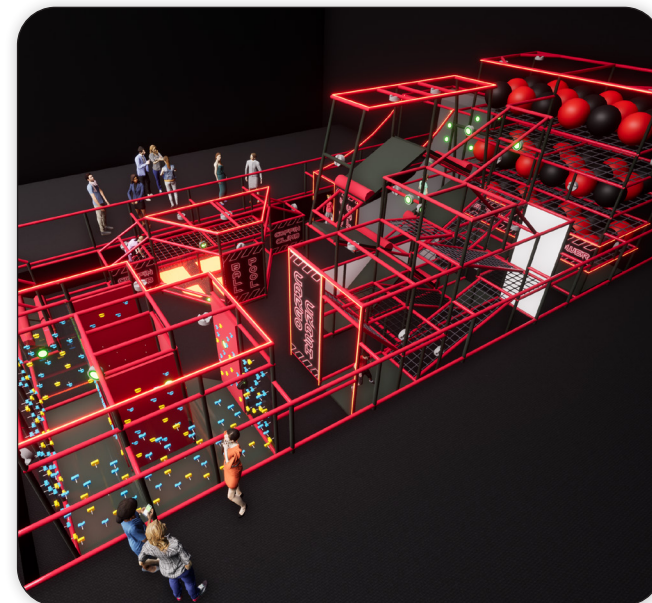

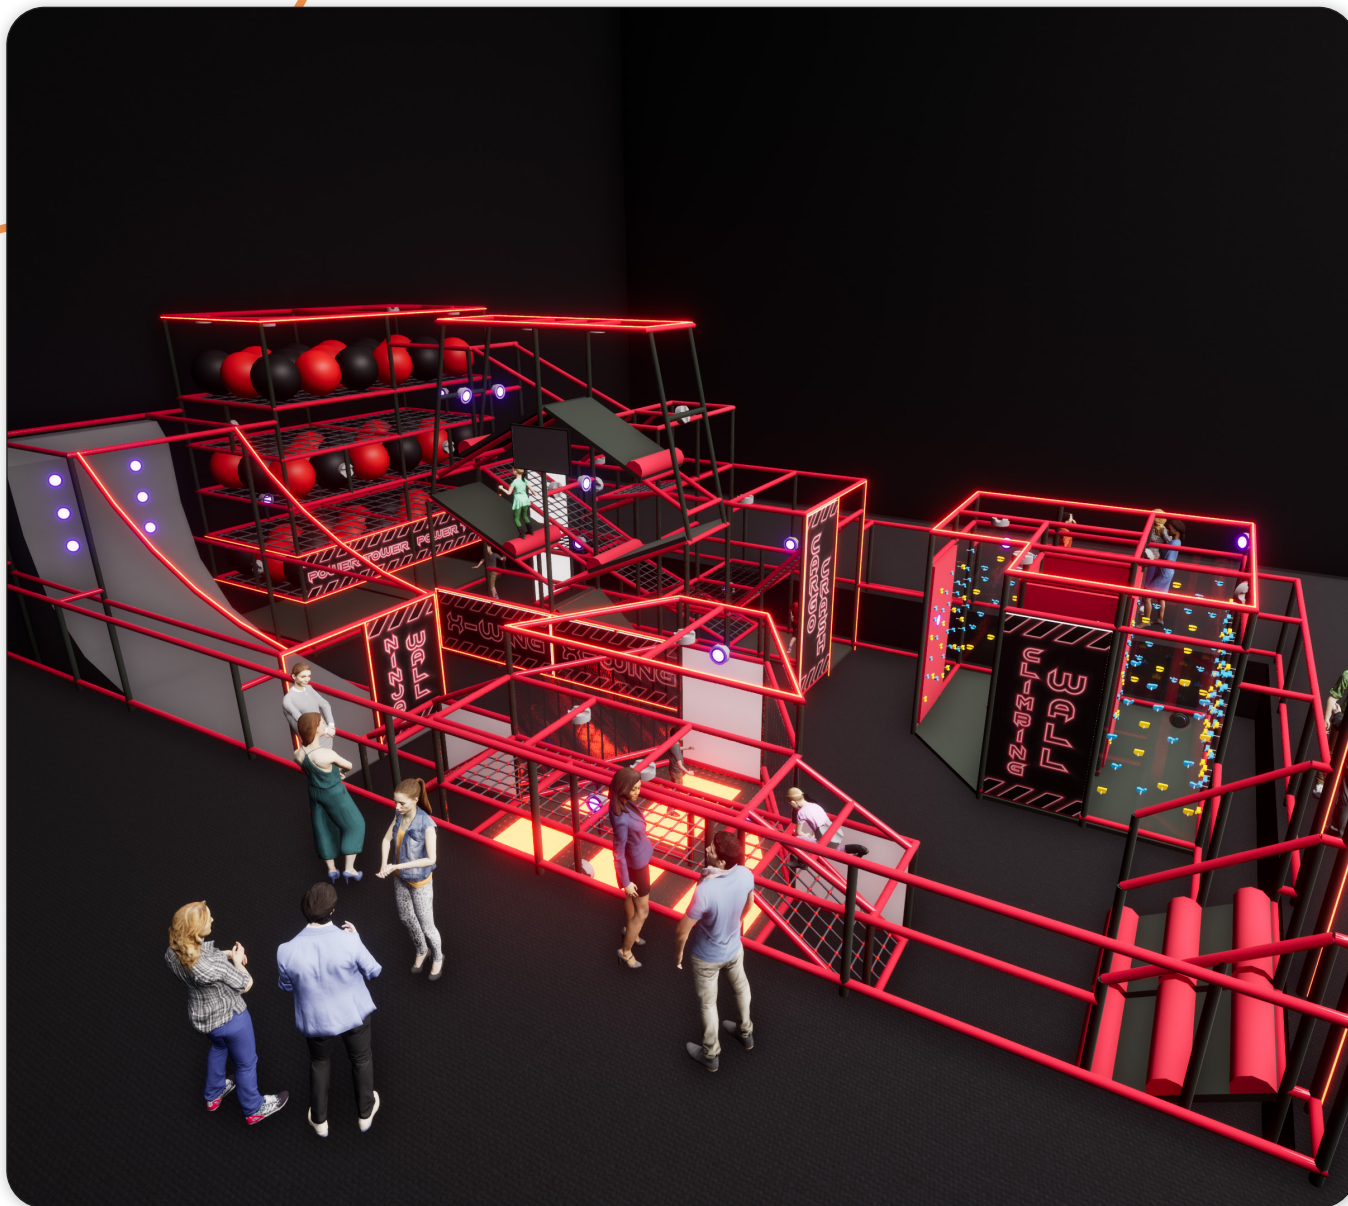

Strike Arena 54.3ft x 30ft x 18ft

Quick to start: This game is for unsupervised environments, with very simple game starting instructions.

- Players can start independently of each other, choosing one of up to 6 colours available at the time they begin
- Each player/colour plays independently of the other players/colours, with the time remaining being shown on the live scoreboards.
- When one colour's game time is complete, after a short pause a new player can start to chase that colour
- Lit pods are distributed equally across the six colours, with 1/6th of all available pods being allocated to each player/colour at any one time.

Dodgeball Court Retrofit Option 3

Strike Arena 54.3ft x 30ft x 18ft

Quick to start: This game is for unsupervised environments, with very simple game starting instructions.

- Players can start independently of each other, choosing one of up to 6 colours available at the time they begin
- Each player/colour plays independently of the other players/colours, with the time remaining being shown on the live scoreboards.
- When one colour's game time is complete, after a short pause a new player can start to chase that colour
- Lit pods are distributed equally across the six colours, with 1/6th of all available pods being allocated to each player/colour at any one time.

Dodgeball Court Retrofit

Option 2

Power Play

32ft x 24ft

Interactive target system for multi-sport pitches

Our Work

Product Specification - Standard

Decks, Floor & Wall Pads

- Manufactured using 6lb reconstituted foam.
- All ground floor pads use 6mm thick plywood with 50mm foam for improved impact resistance.
- All upper floor decks use 18mm thick plywood for increased strength & safety with 25mm foam for improved impact resistance.
- Any electrical components will be removed and replaced with standard floor pads or deck boards.

Netting

- Strong 3mm braided polyethylene netting. Netting manufactured to meet strength requirements BS 8409.
- 25mm pitch netting is used on areas below 2m.
- 50mm pitch netting is used on areas about 2m.
- 8mm anti climb netting is used on areas such as the sides of slides.
- Netting is supplied in black as standard.

Fibre Glass Components & Plastic Slides

- Excellent impact strength, high quality, smooth surface finish.
- Fully UV protected.
- Available in a range of colours. (Fibreglass slides have the option of printed artwork).
- All tubes will be manufactured from plastic, astra and drop slides will be fibreglass.

Steel

- 48.3mm diameter, galvanised steel pipe.
- Assembled using tube clamp structural pipe fittings, manufactured to meet standards BS EN 1562 and 1563.
- Capable of supporting loads of up to 900kg.

Structure Padding

- Co - Extruded Low Density Polyethylene (LDPE), closed foam with an integrally bonded outer layer for reinforcement and extended durability.
- Inert, resistant to oils, gasoline and solvents.
- High tensile strength and highly resilient.
- No additional jacketing required.

PVC

- Hard-wearing, durable and tear resistant. PVC manufactured to meet standards BS3424, testing for strength, flame and water resistance.
- Contains no hazardous ingredients, in accordance with the EC Directive 91/155EC.
- PVC is used to cover floor pads, decks, wall pads, structure padding and soft play shapes.

Product Specification - Premium

Decks, Floor & Wall Pads

- Manufactured using 6lb reconstituted foam.
- All ground floor pads use 6mm thick plywood with 50mm foam for improved impact resistance.
- All upper floor decks use 18mm thick plywood for increased strength & safety with 50mm foam for improved impact resistance.
